Health Information Exchange Notice

Recovery and Wellness participates in CliniSync Health Information Exchange. RWC can use this electronic network to securely provide access to your health records for a better picture of your health needs. We, and other healthcare providers, may allow access to your health information through the Health Information Exchange for treatment, payment or other healthcare operations. **This is a voluntary agreement.** You may opt-out at any time by notifying the Medical Records Department at the numbers listed below OR talking with your clinician.

Contact Medical Records Dept please call and ask for Medical Records Dept.

What is Health Information Exchange?

Information provided by CliniSync

**MY DOCTORS CAN
NOW SHARE MY
MEDICAL RECORDS
ELECTRONICALLY!**

Automatic Consent

You are automatically enrolled in the Health Information Exchange so your medical records can be electronically shared among your doctors. You can opt out of this exchange by filling out the front page of this document.

Important Information for Doctors

Sharing records electronically is a simple, fast way for your healthcare provider to get a "whole" picture of your health in one record, no matter where you have been treated in Ohio.

Saving Time and Lives

This is especially important in an emergency, when you may be unconscious or unable to speak. Your doctor can save time and even your life when your medical history is right there.

Improved Patient Safety

If you're away from home and in Ohio when you get sick, clinicians can view what medical problems you have and see any allergies you might have. This improves your care and your safety.

Quicker Results

When your doctor orders tests, the health information exchange quickly sends those results in real time. Your physician also can get the most up-to-date and accurate information from others who have treated you.

Privacy and Security

Only doctors and staff who treat you can look at your health information. Your records remain private in a secure network that is audited.
